

Six Nations Community Paramedic Program

The Six Nations Community Paramedicine team helps to ensure Six Nations community members receive the medical care they need. Our team endeavors to support our clients in maintaining their independence while intending to remain at home. Patients can be referred to the program via a caregiver, physician, hospital, allied healthcare facilities or through self-referral. Our goal is to reduce 911 calls and the need for emergency department visits in vulnerable patients.

What do Community Paramedics do?

- In-home assessments/monitoring for CHF, COPD, Diabetes complications etc.
- Hospital discharge support
- Remote patient monitoring
- Point-of-care blood draws
- Urinalysis, Vaccine updates
- Assistance with blood sugar monitoring
- Lab requisition fulfillment
- COPD/CHF exacerbation emergency orders
- Wound assessments and monitoring
- Acute fluid therapy
- Referral to appropriate health services available
- ensure NIHB coverage of medical supplies

Six Nations Community Paramedic Program

1 How can I refer a patient to the Community Paramedic Program?

You can refer a patient by completing the referral form and faxing it to 519-445-0991, emailing it to cp@sixnations.ca or call us at 519-750-3908.

2 What types of patients are eligible for this program?

The program is designed for Six Nations and New Credit patients with comorbidities who require in-home care and monitoring. Patients with or without a primary care physician can use this service.

3 Are there any penalties for using this service?

There are no outside use penalties for primary care physicians whose patients see our Community Paramedics.

4 What are the hours for this service?

Our team is available 24/7. Our Medical Director, Dr Andrea East provides oversight 24/7.

In-home wellness checks

Regular drop-ins can be scheduled for eligible adults who live alone to ensure their health and wellbeing.

Community wellness clinics

Monthly clinics offered on Six Nations reserve for community members to use: vitals, medication review, assessments etc.

Remote patient monitoring

Blood pressure, heart rate, oxygen saturation and blood glucose can be collected during each visit and through remote home monitoring.

Connecting patients to services

Facilitating referrals to allied healthcare services including HCC, the Diabetes Wellness Program, the Dementia Care Team, OT/PT, Adult Day Program, Respite care, LTC placement and more.
